Senior Secondary (Pre-engineering)	VELOCIITY (SSC) - Hyderabad	897/1000 89%	Jul, 2016 - Mar 2018
Secondary (High-School)	Mothers Integral (SSC) - Hyderabad	90%	Aug 2011 - Mar 2016

EXPERIENCE

Virtusa - Web Developer Intern

- *Jul. 2021 – Present*
- My role as a web designer intern in this company is to contribute in building a website that basically "provides information for the job applied candidates to track their application status online".
- As it is a java based company, I am using spring as a backend to design the REST APIs that communicate with the front-end which is on Angular.
- The application we (our team) designed will be used as a prototype by the senior developers in adding features to "Virtusa" company portal

Saycheese Technologies - Web Developer Intern

- *Sep. 2020 – Oct. 2020*
- Smilycon is a startup that uses the MERN stack as the primary stack for its web-related projects.
- During my time as an intern, I have contributed in

designing a website that is useful for doctors and patients to interact, and for patients to book appointments.

- My role here was to design an authentication portal using Node JS that allows for the doctors and patients to create user accounts and login into their accounts using JWT (JSON WEB TOKENS).
- I have used technologies like (MongoDB, Express Js, Node js, Nodemailer. etc.)

Personal Projects

→ **ProtoMix - ONLINE SHOPPING CART**
  - ◆ It is a web application that functions just like Amazon.
  - ◆ Technology stack used:
    - Node Js, Express Js, MongoDB, vanilla javascript, AJAX
  - ◆ Github link
    - https://github.com/umakanth-pendyala/ONLINE-SHOPPING.git
→ **Chat Book**
  - ◆ It is a hybrid application of Facebook and Instagram. More like a Facebook with Instagram typed "follow requests".
  - ◆ Technology stack used:
    - Node Js, Express Js, MongoDB, vanilla javascript, AJAX
  - ◆ Github link
    - https://github.com/umakanth-pendyala/CHAT-BOOK.git
→ **Voice Control Mobile app initiator**
  - ◆ Can open mobile applications by voice call
  - ◆ I have developed the app using "Flutter"
  - ◆ Github link
    - https://github.com/umakanth-pendyala/Flutter-voice-control.git
→ Visit my github to view more cool applications that I have created during lockdown
